

# Test Report

Dates: 4/22/19 - 4/28/19

## Summary

There are several things missing in the game at the moment. Quit, withdraw, move history, and game stats have not been implemented. Along with those none of the moves have been developed to the point that they can be tested. I've also located a couple of bugs that do not have a test case defined but at least one has the possibility of breaking the game. The issues mentioned last week still exist and a few other test cases failed this week.

## Issues Without Test Case

Issue	Logged As
Drop down menu trigger disappears on window resize.	BUG #4
When viewing game rules there is no option to return to game	ENHANCEMENT#1
Submit move button logs user out but leaves them on game page as null user	BUG #6
